Scott Farm Seed Company

DEAR SCOTT CUSTOMER:

The seed "cupboard" is about bare on alfalfa, timothy, brome and sweet clover but on red clover, alsike, lespedeza, meadow fescue and a few other items there will be about a normal carryover for another season. A government price support program has been set up to apply to 1949 production of hay and pasture seeds. This should encourage production but at the same time it means the consumer can't expect prices to get very low.

SEED CORN

There is plenty of time for delivery on seed corn. The quality is excellent, grading is uniform, all is treated for protection against seedling diseases found in the soil and prompt shipment can be made. We have supplies of the best grades on nearly all the hybrids listed. Remember there is no extra charge on less than bushel orders.

EMERGENCY HAY AND PASTURE

Sudan grass, soybeans and millet are most widely used. Sudans are seeded at about 20 pounds, millet at 30 to 40 pounds and soybeans at 2½ bushels per acre. Sudan and millet should be seeded rather shallow and fertilized for satisfactory stands and vigorous growth.

COVER CROPS

Annual and perennial ryegrass, crimson clover, vetch and yellow sweet clover may be seeded alone or in mixtures for cover crop purposes. Seeded alone the recommended rates per acre are: Ryegrass 20 lbs., crimson clover 15 lbs., vetch 25-30 lbs., and sweet clover 15 lbs. In a mixture each is used at about half the normal rate. The legumes should be inoculated.

SOYBEANS

HAWKEYE—Quality and yield equal to Lincoln, mature about the same time as Richland and stand as well. They are recommended as first choice throughout Ohio and since earlier than Lincoln are better suited where wheat is to follow beans. Certified \$4.75 per bushel. From Certified \$4.25 per bushel. Inoculation included.

RICHLAND—A stiff stalked, high yielding, medium early variety. They are best suited to dark productive soils. Uncertified \$3.60 per bushel. Inoculation included.

LINCOLN—A high yielding, top quality, full season variety. About a week later than Hawkeye and Richland and not as resistant to lodging. Adapted where seeding wheat after beans is not a problem. Certified \$3.85 per bushel; Uncertified \$3.50 per bushel. Inoculation included

BLACKS—Suited for hay production, finer stemmed and leafier than the yellow varieties. Use 2-2½ bushels per acre, \$3.60 per bushel. Inoculation included.

WE WILL HAVE some of the new early Monroe variety next year.

SCOTT FARM SEED COMPANY.

Seed Price List

April 20, 1949

"SCOTT'S" grade is the highest quality seed available. It is carefully selected and thoroughly re-cleaned. Noxious weed free. May contain 0.10% to 0.25% other crop seed and in most cases will test 99.75% pure seed.

MECHANICSBURG
OHIO

SPECIALS: The grades marked "Special" may be slightly off in appearance, lower in germination, or contain a small amount of other clovers or crop seed. This seed is clean and perfectly safe to sow.

CROW REPELLENT

Treats 1 bu. corn.....	\$.60
Treats 2 bu. corn.....	1.00

Scott's FARM WEED KILLER

STANTOX 64 (Alkanolamine Salt)

A 40% 2,4-D acid equivalent applied ½ pint and up per acre. Can be applied in 5-10 gallons of water per acre.

1 Gallon Can.....	\$7.25 gal.
5 Gallon Can.....	7.00 gal.

STANTOX P-44 (Ester Form)

A 37% 2,4-D acid equivalent in ester form applied ½ pint and up per acre. For hard-to-kill types of weeds.

1 Gallon Can.....	\$8.75 gal.
5 Gallon Can.....	8.50 gal.

SCOTT'S 4-X DUST (Dusting Form)

¼ Acre Size.....	\$1.25
1 Acre Size.....	3.75
Horn Duster90
Hand Crank Duster	20.15
(Dobbin's No. 200)	

Farmers got excellent results in using the several kinds of 2,4-D weed killing materials last season. For many weeds there is very little difference in the final kill between the different forms of 2,4-D. Of the liquids the ester is more apt to drift on susceptible plants but is better suited to adverse weather conditions than the salt form. A new, 2,4-5-T ester will soon be available that will kill briars and more of the woody types of growth. Carefully follow directions on containers for best results.

TREATED HYBRID SEED CORN

SCOTT'S Hybrid Corn has been graded for width, length and thickness and will plant easily and accurately in any make of planter. Ohio certified Hybrids not listed are available upon inquiry.

The round kernels are graded uniformly and will yield just as well as the flats but special plates are usually required for accurate planting. All corn is treated for protection against disease.

EARLY MATURING HYBRIDS

	Round Grade	Flat Grade
SCOTT'S 11	\$8.50 bu.	\$11.00 bu.
Ohio M-15	8.00 bu.	10.00 bu.
SCOTT'S 22	8.50 bu.	11.00 bu.

Ind. 750 (White)		10.00 bu.

SILAGE BLENDS (Flats) (Early or Late) \$6.00 bu. (No extra charge on less than bushel orders.)

SCOTT'S 11—Slightly earlier than Ohio M-15. Large ears for an early hybrid. Has out-yielded Ohio M-15. Sound dark yellow ears. Suited to short season or late planting.

SCOTT'S 22—The maturity of Ohio M-20 and M-34. Has outproduced its maturity class on many different farms. Good roots, sound ears, good quality fodder, dries out quickly.

SCOTT'S 33—Maturity of K Hybrids. A real producer with disease and smut resistance. Easy husking, nice fodder, not as tall as K-24. Will pick clean and crib early.

SCOTT'S 66—One of the best medium maturing hybrids in the corn belt. Disease resistant, husks easily, strong roots, high yields on a wide variety of soils.

SCOTT'S 60 W—A white hybrid, medium sized fodder and ears. A good producer in its maturity class. Strong roots and stalks, good crib corn. Thoroughly tested in the corn belt.

EARLY SILAGE BLEND—A blend of the earlier maturing hybrids for short season use. Seed is uniformly graded flats and above 90% germination. Will plant 8—10 acres per bushel and may be used for crib corn.

SCOTT'S 75—Slightly earlier and not quite as tall as most of the C Hybrids, blight resistant, sturdy stalks, large dark yellow ears, bred for handy size and high yields.

SCOTT'S 99—Maturity of U. S. 13 and bred for more corn borer resistance and higher yield. Dark green color. Not quite as tall as U. S. 13. Good sized, sound ears.

LATE SILAGE BLEND—A blend of the later maturing hybrids recommended for full season planting. Slight variation in maturity gives high yields of balanced quality feed. May be used for crib corn. Flat kernels.
